

Ahmed Elbary

Robotics Engineer

Lincoln, UK | [+447958642742](tel:+447958642742) | linkedin.com/in/ahmed-elbary | ahmadalberry@hotmail.com | github.com/ahmed-elbary

Profile

Motivated MSc Robotics graduate with a strong foundation in mechatronics engineering and practical experience in robotics system integration, design, and prototyping. Experienced in applying **robotics safety standards** (e.g., ISO 12100, ISO 13849, ISO 18497) in autonomous system design. Skilled in electronic systems development and hands-on applications, including **ROS2, Linux, and Gazebo simulation**, with working knowledge of **Python and C** for control and embedded systems. **Currently on a UK Graduate Visa and eligible for the Skilled Worker 'New Entrant' route (offering a reduced salary threshold of £33,400 and lower sponsorship costs)**. No relocation support required.

Work Experience

JABAS.AI – IRoN-RAS Project, University of Lincoln

Project Assistant

Lincoln, UK

March 2025 – July 2025

- Contributed to the development and integration of ROS2-based software components for an autonomous agricultural robot platform.
- Assisted in the implementation and testing of safety-critical functions including obstacle detection, emergency stop systems, bumpers, and audiovisual warning indicators.
- Involved in reviewing robotics safety guidelines and best practices relevant to autonomous systems, applying standards such as ISO 12100, ISO 13849, and ISO 18497 during system design and testing.
- Collaborated with a cross-functional team working on hardware-software integration for real-world field conditions

LCASTOR Team, University of Lincoln

Team Member

Lincoln, UK

October 2024 – September 2025

- Assisted in organizing robotics workshops, contributing to events planning, logistics, and technical demonstrations.
- Actively participating in team discussions and understanding of the Field Robot Event 2025 in Milano competition.

Egyptian National Service

Data entry operator

Egypt

October 2022 - November 2023

- Ensured timely and accurate data processing and record management.
- Enhanced skills in Microsoft Office, critical thinking, and database management.

Thinker Space Company

R&D Intern

Johor Bahru, Malaysia

June 2021 - September 2021

- Conducted research on project topics to inform design and development.
- Created circuit schematics using Autodesk Eagle for precise electronic layouts.
- Designed 3D models using Autodesk Fusion 360 for prototypes and components.

Rondy Ceramic Company

Production Engineer Intern

Beni Suef, Egypt

June 2021 - September 2021

- Gained knowledge in production line processes, troubleshooting machine malfunctions, and PCB repairs.
- Worked with TGV technology by TecnoFerrari Company.
- Enhanced teamwork and understanding of workplace culture.

ROBOCON Club

Trainee

Johor Bahru, Malaysia

March 2018 - July 2018

- Participated in a robotics club across Mechanical, Electrical, and Programming departments.
- Designed and developed a line-tracking car for local competitions, applying skills across multiple engineering disciplines.

Education

University of Lincoln (UoL)

MSc in Robotics and Autonomous Systems

Lincoln, UK

September 2024 - September 2025

Classification: Distinction

Relevant Coursework: Robot Programming and Simulation, Computer Vision, Autonomous Systems, Artificial Intelligence.

Universiti Teknologi Malaysia (UTM)

BEng Electrical - Mechatronics

Johor Bahru, Malaysia

September 2017 - February 2022

Classification: 2:1 class grade equivalent

Relevant Coursework: Mechanical Design, Embedded Systems, Automation, Control Systems, Electrical and Electronic Circuits.

Skills

Technical Skills

Robotics

- ROS2
- Robot Simulation
- Autonomous Systems

Engineering Tools

- Linux
- Git
- MATLAB
- Microsoft Office

Programming

- Python
- C

Embedded & Electronics

- Arduino
- Circuit Design

CAD

- SolidWorks
- Fusion 360

- **Teamworking:** Strong collaborative skills developed through volunteer leadership roles and group projects, fostering a supportive and productive team dynamic.
- **Communication:** Effective communicator, capable of conveying ideas clearly and listening actively to enhance understanding and teamwork.
- **Leadership:** Experience leading teams in volunteer settings, guiding projects to successful completion while motivating team members.

Voluntary Experience

Event Assistant – Robotics Competition, University of Lincoln

Supported a university-hosted robotics competition by guiding visitors and assisting with event setup and logistics.

Student Union Volunteer – Universiti Teknologi Malaysia (UTM)

Volunteered across academic and multimedia committees for three years.

- Elected Head of Academic Committee in final year
- Organised workshops, academic support sessions, and student events

Awards & Certifications

Lincoln Award Plus, University of Lincoln

Candidate

Lincoln, UK

June 2025 - July 2025

An advanced and intensive employability award building on the foundation of the Lincoln Award, with focus on real workplace readiness:

- Strengths Profile reflection workshop
- Upskilled through self-directed online learning in Python programming
- Workshops on communication, resilience, and adaptability

Lincoln Award Employer Projects, University of Lincoln

Team Member

Lincoln, UK

October 2024 - January 2025

- Collaborated with a group of 7 students from a variety of courses, stages of study and multicultural backgrounds to achieve the objectives.
- Conducted research and analysis to support ProAmpac's efforts in addressing skills shortages and improving recruitment and training processes for the printer role.
- Completed training on Project Planning & Conflict Management, Understanding Behaviours & Giving Feedback, and Presenting with Impact and Confidence.
- Co-authored a business report outlining the research process, key findings, and actionable recommendations for the client.

- **Microsoft Office Specialist: Excel Associate (Office 2019), University of Lincoln**
- **Microsoft Office Specialist: Word Associate (Office 2019), University of Lincoln**
- **Microsoft Certified: Azure AI Fundamentals, University of Lincoln**

Issued: April 2025

Issued: March 2025

Issued: March 2025
